

Power Station Switch Update/Service Information

The following information pertains to all Shopsmith Power Stations. If you have recently purchased or are repairing a Power Station, which contains a Date Code of 11/25/92 or later, please refer to Item #1 below. If you are repairing a Power Station, which contains a Date Code earlier than 11/25/92, please refer to Item #2 below.

1. The following Part Numbers have changed; please update your Power Station Instruction Manual.

Ref. No. 36, Part No. 514796, Description – Locking Rocker Switch, Qty 1
SHOULD NOW READ Ref No. 36, Part No. 522278, Description – On/Off
Switch, Qty 1.

2. **The following Parts/part Numbers have changed; please update your Power Station Instruction Manual.**

You should have ordered and received Part No. 522387 for replacing the switch in your Power Station. It contains the following:

- 522278 – On/Off Switch (1)-
- 522456 – 3/16” Single Spade Terminal (4)

If the switch being replaced contains 4 terminals, then attach the 4 Single Spade Terminals (522456) to the new On/Off Switch (522278). Make sure you push each terminal onto the switch as far as it will go.
